

V Fold Tyrannosaurus rex

If you have access to a colour photocopier you may wish to enlarge this onto A3 card.
 Score the dotted lines with a ruler and a blunt knife or small screwdriver.
 Remove the base and keep safe.
 Fold the dinosaur in half and carefully cut it out.
 Valley fold the dotted line A-A and mountain fold the angled dotted lines next to it.
 Fold the neck up.
 Mountain fold B-B and valley fold the angled dotted lines next to it.
 Fold the head down and glue the sides of the head together.
 Glue the two sides of the tail together.
 Cut out the base.
 Mountain fold the feet bases at C-C and glue to the base where shown.

! Cutting around the teeth is very difficult!
 An easier option is to colour-in the space between the teeth with a black pen and cut across the front.
